q_be

**PRODUCT
DETAIL**

Made for professionals and quality conscious beginners

The perfect 3d printer to start making your own projects come to life. No matter if you are a professional using it in your own business or a simple beginner looking for the right tool to boost your creativity, tred Q_be has all the features you need to create high quality 3d printings. With its compact and clean design, solid build materials and user friendly interface it's the perfect choice both for your office or your home.

Print easily, even without your laptop

Tred Q_B comes out with enhanced connectivity and a touchscreen display to make the printing process easy and customizable. Thanks to the wireless functionality you can connect the printer to your network and send your files to the printer directly from your computer. The touch interface allows to easily control the printing process visualizing and controlling all the parameters of your printing and it syncs with your web interface, so that you don't have to worry about anything.

Beautiful, clean and functional design

Tred Q_be is compact enough to perfectly fit in your desktop designed to keep your workspace always safe and clean with the two cartridges and all the cables kept inside. In just 40cmX40cmX40cm you have a 20X20X20cm build area and all you need to successfully achieve your projects. It's easy to carry and you can even decide to customize the look and feel choosing between a range of beautiful colors.

Quality materials and the perfect mix of features

The 20X20X20 build area is put inside a closed frame with heated print bed and dual extruder. The body is made entirely in steel to resist vibrations and the three axis system allows to maintain the print bed stable even after a carry. No more frequent annoying calibrations, just plug and print!

Your next professional desktop 3d printer
